Hospital Department of the State of Pennsylvania,
May 23, 1861.

The following regulations for the "Hospital Department" of the State of Pennsylvania, having been approved by the Commander-in-Chief, are directed by him to be published for the government of all concerned. Nothing contrary to the tenor of these regulations will be enjoined or allowed in any part of the forces of the State of Pennsylvania, by any command whatsoever.

ED. M. BIDDLE,
Adjutant General, State of Pennsylvania.

REGULATIONS

FOR THE

HOSPITAL DEPARTMENT.

1. The Hospital Department shall consist "of a *Surgeon General*, with the rank of Colonel, who shall be a member of the Grand Staff; of a *Division Surgeon*, with the rank of Major, to each Division when in active service; of a *Brigade Surgeon*, with the rank of Captain, to each Brigade when in actual service, and of Surgeons and Surgeon's Mates."

2. "The rank of all said officers shall not entitle them to promotion in the line, nor shall it regulate their pay and rations, except when in actual service under a requisition of the President of the United States or the proclamation of the Governor."

SURGEON GENERAL.

3. The Surgeon General, under the direction of the Major General in command, is charged with the administrative details of the Medical department, and has the complete control of all the officers belonging to it. He will assign the Surgeons and Surgeon's Mates to regiments, posts or stations, and will issue all orders and instructions relating to their professional duties; and all communications from them, which may require the ac-

tion of the Commander-in-Chief or the Major General commanding the army, will be made direct to him.

4. All claims for medical services rendered, or medical supplies furnished to the army, and all disbursements made on account of the "Hospital Department," shall be submitted to him for examination and approval.

5. He will furnish estimates of all expenditures, and regulate the transmission of all funds for his department. He will require from the Medical Purveyors monthly duplicates of the invoices of all supplies put up for, and delivered or forwarded to, the several Surgeons and Surgeon's Mates of the "Reserve Volunteer Corps" of the State.

6. He will examine the returns and accounts of all Surgeons, Surgeon's Mates and the Medical Purveyors; see that proper vouchers are sent for articles purchased and issued, and that the quantities expended with the sick are according to the number on the sick reports, and the nature of their complaints, and transmit them to the office of the proper accounting officer of the Treasury for final settlement. If he does not receive proper vouchers for issues, and satisfactory evidence that articles so reported have been lost or destroyed by unavoidable accident; or if, upon comparing the returns with the reports of the sick, there appears to have been any improper expenditures of medicines or stores, either in quantity or quality, he will require an explanation thereof from the person making the return, and, if necessary, instruct the Division or Brigade Surgeon to examine the books and accounts of said person, and to ascertain how

and why such expenditures have been made; and the amount of any articles proven to have been improperly applied, will be charged to the account of the person who has thus misapplied them.

7. He will require from the Division and Brigade Surgeons, reports relative to the condition of the hospitals under their charge; the character and conduct of the Surgeons and Surgeon's Mates; the state of their books, accounts and supplies; the medical topography of the several posts and stations; the nature of the prevailing complaints, their probable causes, and the treatment adopted.

8. He will require from every Surgeon and Surgeon's Mate performing the duties of a Surgeon, weekly reports of the sick and wounded, with such remarks as may be necessary to explain the nature of the diseases of the troops, the practice adopted, and the medicines and stores required.

9. He will require from every Surgeon and Surgeon's Mate, having charge of public property of any description for the use of the sick, duplicate monthly returns of the same, and also duplicate quarterly requisitions for the supplies required for each hospital, regiment, post or garrison, and transmit them, with his instructions, to the Medical Purveyors.

10. He will, from time to time, inspect the several hospitals, and make to the Major General in command, such reports and returns as may be necessary to explain all the concerns of the department under his charge; with such remarks relative to improvements in practice

and police, and to the clothing, subsistence, &c., of the army, as may seem to be requisite for the preservation of health, the comfort and recovery of the sick, and the good of the public service.

DIVISION SURGEON.

11. The Division Surgeon will inspect the hospitals under his charge; ascertain the manner in which each officer performs his duties; see that the necessary supplies are received for the sick, that they are of good quality, and properly expended; enforce the rules and regulations given for the government and direction of the Surgeons and Surgeon's Mates; and examine, and if he approve, countersign all extra requisitions for medical supplies.

12. He will strictly examine the case-books, prescription-books, and diet-books of the Surgeons and Surgeon's Mates, and from them ascertain the nature of the diseases that have prevailed; their symptoms; the practice adopted and the result; and hence judge of the professional abilities of the attending Surgeon, and ascertain that the quantity and quality of the stores and medicines used are conformable to the nature and duration of the complaints.

13. From suitable inquiries concerning the clothing, subsistence, quarters, &c., of the men, he will discover, as far as practicable, the probable causes of disease; recommend the best methods of prevention; and also make such suggestions relative to the situation, construction, and economy of the hospitals, as may appear

necessary for the benefit and comfort of the sick, and the good of the service.

14. He will examine the books and accounts of the Stewards; see that their issues of hospital stores and furniture agree with the diet-books and written orders of the Surgeons and Surgeon's Mates, and that they have kept a correct account of the rations drawn, agreeably to the register and muster-rolls of the hospital; ascertain, also, that the Wardmasters keeps a strict account of the bedding, furniture, cooking utensils, &c., received for the use of the hospital; of the articles lost, worn out, or destroyed by order; and also of the clothing, arms and equipments of every patient admitted, and that they are disposed of agreeably to the regulations on that subject; and that they pay due attention to enforcing the police prescribed, and to the order and cleanliness of the patients, wards and kitchens.

15. He will make to the Surgeon General, at such period as he may direct, reports, containing all the information he may obtain concerning the character, conduct, and attention to duty of the several Surgeons and Surgeon's Mates; the order and condition of their hospitals, and the state of their books, accounts, and supplies, with such remarks relative to the causes of diseases, the best means of preventing them, their symptoms, and the treatment adopted, as appertain to the report of a medical inspecting officer.

MEDICAL PURVEYORS.

16. The Medical Purveyors shall, under the direction

of the Surgeon-General, cause suitable medicine-chests to be constructed and furnished to the several hospitals, regiments, posts, and garrisons, and purchase all medicines, hospital-stores, bedding, surgical and other instruments, books, stationery, and dressings, required for the Medical Department of the army, by the "Standard Supply Table," and these articles shall be carefully packed under their direction, and delivered either to the Surgeons or to a Military Storekeeper, or to a Quartermaster, for transportation to the places of their destination and use. All packages shall be legibly marked, with the name of the place to which they are to be sent, or of the regiment or corps for which they are intended, and accompanied with an invoice of the articles contained in them.

17. They shall make no purchases or issues except upon the requisitions or estimates received from the Surgeon-General, or on requisitions countersigned by a Division or Brigade-Surgeon, except in extraordinary cases, as the marching of a detachment, the arrival of a greater number of men at a post than had been estimated for, the loss or miscarriage of any articles, unusual expenditure from a sickly season; which issues will be regulated by the standard supply-table, and made upon the requisitions of the attending Surgeon, approved by the commanding officer.

18. They shall forward to the Surgeon-General quarterly accounts of their expenditures the vouchers for which will be accompanied with a certificate on honor that the services have been rendered, or that the supplies have been purchased by their order, at the lowest market

price of the day and on account of the Hospital Department of the State.

19. They shall make duplicate monthly returns to the Surgeon-General of all supplies received and issued by them, and of the articles remaining on hand; and transmit duplicates of the invoices of all issues to the Surgeons and Surgeon's Mates, accompanied with the receipt of a Surgeon for the articles, or of a Military Storekeeper, or officer of the Quartermaster's department, for the several packages containing them.

BRIGADE SURGEON.

20. The Brigade Surgeon or the Surgeon in charge of a General Hospital will observe the instructions of the Division Surgeon in every thing relating to the hospital under his charge; superintend its government and police; and be held responsible for the manner in which the subordinate officers perform their respective duties.

21. He will keep a register (Form 1) of all patients admitted into his hospital, and will receive, and carefully preserve, the descriptive list of each individual; noting on it any payments made, or clothing issued to him, while in hospital. Should any Surgeon or Surgeon's Mate send patients to his hospital without the report required by regulations, and certified copies of their descriptive lists; or, should they be sent by any officer of the line, without their descriptive lists, he will forthwith require them; and if not sent within a reasonable time, or some good cause assigned for the neglect, he will immediately apply to the commanding officer for

the arrest of such delinquent, on the charge of disobedience of orders.

22. He will keep a *case-book*, *prescription-book and diet-book*, (Form 2,) in which will be daily recorded the symptoms in every important case, together with the medicines and diet prescribed; and these shall serve as a guide to the Surgeon's Mate in delivering the medicines; to the Steward in distributing the stores; and for the information of the Division Surgeon. He will keep an order and letter-book, in which will be transcribed all orders concerning, or in any way relating to the "Hospital Department." He will also preserve copies of his quarterly requisitions, semi-annual returns, and monthly reports of sick and wounded; and of all orders, and all communications written or received by him, in any way connected with his official duties at the post; which, with his hospital books, will be delivered to the officer or person who may relieve him.

23. He will distribute his patients into convenient divisions, which will be assigned to the particular charge of the several Regimental Surgeons or Senior Surgeon's Mate, and every morning, at as early an hour as practicable, visit each brigade, prescribe himself in all important cases, and consult with the Regimental Surgeon; and in the evening inquire of the Surgeon's Mate the state of the sick, and again visit such as may require particular attention.

24. He will, as far as practicable, assign appropriate wards to his patients, according to the nature of their complaints; be careful that they are well ventilated, and

the patients not too much crowded; by a rigid attention to police, prevent, if possible, the origin of contagion; and, should it appear, make every exertion to counteract it, by removing his patients to more extensive and airy apartments, enforcing personal cleanliness, and by frequent changes of linen, bedding, &c.

25. He will prescribe such rules and regulations as he may deem necessary for the direction of the attendants, and the order, cleanliness, and convenience of his patients; and cause them to be printed, or written in a legible hand, and hung up in some conspicuous place in each ward.

26. He will, from the descriptive lists in his possession, make regular muster-rolls of the patients in his hospital, and also of his stewards, wardmasters, cooks, nurses and matrons, (Form 3,) for the examination and certificate of the inspecting officer, as in other cases of muster and inspection for payment.

27. He will see that his Steward makes out correct returns for rations, according to the number of patients and attendants present; direct what part of the ration shall be retained and sign the requisitions. In lieu of the rations or parts of rations retained, he will make requisitions upon the Assistant Commissary of Subsistence, for such supplies of vegetables, milk, groceries, or other articles of diet, as he may think necessary for the use of the sick: *Provided*, That the cost of the articles so purchased, does not exceed the value of the rations and parts retained, at the contract price at the post or station.

28. He will, once a week, examine the books and ac-

counts of his Steward and Wardmaster; see that the hospital stores have been properly applied; that the arms, clothing and equipments of the patients are cleaned, numbered, marked, registered, and deposited in the Wardmaster's room; and that a regular account is kept of the furniture, bedding, &c., in use in the hospital; and if any attendant or patient shall be convicted of wilfully destroying or purloining any article of public property, the amount of its value will be charged to him by the Surgeon on his descriptive list, and deducted from his pay at the next payment; and it will be the duty of the Brigade Surgeon to prosecute any citizen who may buy or receive public property of any description, from any one attached to the brigade, agreeably to the law on that subject.

SURGEON'S MATES OF GENERAL HOSPITALS.

29. The Surgeon's Mates will obey the orders and instructions of the senior Surgeon; see that subordinate officers attend strictly to their duties, and aid in enforcing the regulations of the general hospital.

30. Each Mate will accompany the Surgeon in his morning visit to the wards assigned to his particular charge; make the proper entries in the case-book, prescription-book, and diet-book, and from the latter fill up the diet-table for the day; in the evening, he will again visit his wards, and, if necessary, report to the Surgeon.

31. He will be responsible for the proper distribution and administration of the medicines prescribed; for the

manner in which the Wardmaster and nurses perform their duties in his own division; and that the patients conform to the prescribed regulations.

32. One of the Surgeon's Mates will be detailed daily to reside within or near the hospital, at all hours of the day and night; he will prescribe in urgent cases; examine such patients as may be sent to the hospital; see that they are entered into the register; that their descriptive lists are filed, and, if they do not bring them, report it forthwith to the Surgeon; that the Wardmaster takes charge of their clothing, arms, and equipments; that they are washed, furnished with clean garments, and placed in their appropriate wards; and report to the Surgeon the next morning, and immediately in important cases. As police officer of the day, he will see that all the orders and regulations of the general hospital are duly attended to.

33. One of the Surgeon's Mates will take charge of the books of the hospital, viz: the register, case-book, prescription-book, diet-book, and the order and letter-book; and call at the office of the Adjutant General every day, or as often as may be convenient, and transcribe all orders relating to the "Hospital Department." He will also take charge of the descriptive lists of the patients, and have them regularly filed according to their companies and regiments or corps.

34. One Surgeon's Mate will take particular charge of the dispensary, instruments and medicines; keep an account of expenditures, agreeably to the prescription-book; make out the semi-annual returns of medicines, instru-

ments, stores, &c., and present them to the Surgeon for his examination and signature.

HOSPITAL STEWARDS.

35. The Steward will receive and take charge of all hospital stores, furniture of every description, and supplies purchased for the use of the sick; keep a roster of the nurses and attendants, and from this and the register make out returns for rations according to the number in hospital, and present them to the Surgeon for his examination and signature; receive and distribute the rations; and submit his books and accounts to the Surgeon for examination, at the end of each month, or oftener if required.

36. He will issue the hospital-stores and other supplies to the cooks and nurses, and enter in a book, daily, the amount of each article delivered, (Form 4,) for which the diet-book and written orders of the Surgeon and Surgeon's Mate will be his vouchers. He will deliver to the Wardmaster, such articles of bedding, furniture, cooking utensils, &c., as shall, by written orders, be directed for the use of the hospital; be responsible for the order and neatness of the store-room; and on no account allow any of the patients or attendants to enter it in his absence, or to remain there longer than may be necessary to obtain their supplies.

WARD-MASTERS.

37. The Wardmaster will, on the admission of a patient, into the hospital, take charge of his clothing,

arms and equipments; see that they are perfectly cleaned; that they are registered in a book, which he shall keep for that purpose, (Form 5,) numbered, labelled with the name, rank, company and regiment, or corps of the owner, and deposited in an appropriate apartment; and, in case of his death, he will deliver to the Surgeon an inventory of the above named articles, together with any money and effects left by him.

38. He will receive from the Steward all the furniture, bedding, cooking utensils, &c., required for the use of the hospital, and be held responsible for them; and will keep a book, (Form 6,) in which he will record the articles distributed to the several wards and kitchens, holding the nurses and cooks responsible for whatever he may deliver them. He will, once a week, take an inventory of every thing in use, and report to the Surgeon whatever is missing, worn out, or destroyed by order; and also the name of any patient or attendant whom he may suspect of wilfully destroying or purloining any species of public property.

39. The cooks, nurses and attendants, will be under his immediate direction, and subject to his orders. He is responsible for the cleanliness of the patients and attendants; of the kitchens, wards, furniture and cooking utensils; he will call the roll of the wards at sunrise and sunset, and report absentees; see that every patient is washed and his hair combed every morning; that the wards are swept and sanded, and the beds made, before the time of the morning visit of the Surgeon; that the close-stools and spit-boxes are made perfectly clean every

morning, and the pans emptied and washed immediately after being used, and partly filled with powdered charcoal and water; that the beds and bedding are frequently aired and exposed to the sun, and the straw changed once a month, or oftener if necessary; and when a patient dies, that the straw is burned, the bunk, bed-sack and bedding cleansed, and returned to the Steward, if not required in the hospital.

SURGEONS OF REGIMENTS.

40. The Surgeon of a Regiment will obey the instructions of the Brigade Surgeon when present; be responsible for the order and neatness of the Regimental Hospital, for the manner in which the Surgeon's Mate and attendants perform their respective duties, and for the comfort and convenience of those sick in quarters.

41. He will observe all the regulations given for the Surgeon of a general hospital, in relation to the register, case-book, prescription-book, diet-book, order and letter-book, and preserve copies of his reports, returns, requisitions, &c., and also all those respecting the ventilation of his hospital; preventing or obviating the effects of contagion; prescribing suitable police regulations; making out muster rolls of his nurses and attendants; signing requisitions for rations, directing what part shall be retained; making returns for vegetables, milk, &c.; examing the returns, books and accounts, of his Steward and Wardmaster, and punish according to the army regulations of the United States those who wilfully de-

stroy or purloin public property, or receive any property thus purloined.

42. He will receive written morning reports of sick, from the Orderly Sergeant of each company, who will see that those reported present themselves at the place appointed by the Surgeon, and be present himself at their examination. He will immediately report all cases of feigned sickness to the commanding officers of companies; prescribe for those who are able to remain in quarters; and send those who require it to the hospital. He will then visit his hospital, prescribe himself in all important cases, and in the evening, again see those who require particular attention.

43. Unless specially directed, or in uncommon cases, he will send no patients to a general hospital, except his own be crowded, or he be ordered to march, when he will send all whom he may judge unable to accompany the regiment.

44. He will report to the commanding officer those who should be allowed to ride, or have their knapsacks, &c., carried in the wagons, guarding carefully against deception; accompany the regiment on the march; be within call, in case of accident; and at all times have his instruments and dressings ready at hand, to attend the wounded.

SURGEON'S MATES.

45. The Surgeon's Mates will accompany the Surgeon in his morning visit; make the proper entries in the case-book, prescription-book and diet-book; frequently

visit the hospital during the day, and report to the Surgeon in the evening, and oftener in urgent cases; attend to the preparation and distribution of the medicines; assist in making out the proper reports and returns; see that the nurses are attentive to the sick, and regularly administer the medicines prescribed; and that the regulations of the hospital are strictly attended to.

46. The Senior Mate will take charge of the register, and see that each patient be regularly entered therein, and that the Steward and Wardmaster attend to all the duties required by the regulations. The Junior Mate will have particular charge of the medicines and instruments; be responsible to the Surgeon for their good condition; and see that all orders relating to the "Hopsital Department" are transcribed in the order-book.

STEWARD AND WARD-MASTERS OF REGIMENTS AND POSTS.

47. The Steward and Wardmaster will observe all the regulations given for the Steward and the Wardmaster of a General Hospital; in relation to the hospital stores, rations, and other supplies; to the bedding, cooking utensils, and hospital furniture; the clothing and effects of the men; the conduct of the attendants; the order and neatness of the patients, wards, kitchens, and storerooms; and to keeping his books and accounts, and submitting them to the Surgeon for examination.

REPORTS, REQUISITIONS, AND RETURNS.

48. Every Surgeon and Surgeon's Mate, having charge

of an hospital, will make a weekly report of sick and wounded to the Surgeon-General, (Form 7,) stating the nature and symptoms of the complaints reported, the treatment adopted, the medicines and stores most in demand, and the strength of the command during this period; and will transmit therewith his observations upon the medical topography of the post, station, or hospital, the climate, prevalent diseases, and their probable causes. He will also report the names, rank, &c., of those who die, or are discharged from service while in hospital, as recorded in the register; stating, particularly, the nature of their complaints, and whether they originated "while in the line of their duty."

49. Every Surgeon and Surgeon's Mate having charge of the sick, will make a weekly report to the Surgeon-General; and every one attending the sick of a regiment, post or garrison, will make a morning report to the commanding officer, (Form 8,) with such remarks and suggestions in relation to whatever may affect the healthfulness of the post, as he may deem necessary and proper for the prevention of disease, and the convenience and recovery of the sick.

50. Every Surgeon and Surgeon's Mate, having charge of an hospital, will transmit to the Surgeon-General, on the last day of each month, duplicate requisitions, agreeably to the standard supply-table, for the supplies required for the ensuing month, (Form 9,) stating the strength of the command for which they are made. When he requires additional articles, or a greater quantity than is allowed, he will particularly state his rea-

sons therefor; otherwise all supplies will be furnished agreeably to this table.

51. Every Surgeon and Surgeon's Mate, on receiving supplies from a Medical Purveyor, Military Storekeeper or Quartermaster, or from another medical officer, will immediately report to the Surgeon-General, whether they are of good quality and in good order, and whether they agree with the invoice or requisitions; and will therewith transmit his receipts for the same. He will, at the same time, report to the person furnishing the supplies all discrepancies between the articles received and the accompanying invoices, and all losses from breakage or any other cause. On issuing supplies, *he will immediately transmit invoices of the same to the Brigade Surgeon*, that they may be charged to the persons receiving them.

52. Every Surgeon and Surgeon's Mate, having charge of public property of any description for the use of the sick, will render duplicate returns of the same to the Surgeon-General on the first day of every quarter, from January 1st, (Form 10,) stating from whom and at what time supplies were received; and accompanied with receipts for those issued, and explanations in relation to articles lost, destroyed, &c., and they will particularly report the condition of their instruments, bedding and furniture.

53. All articles of medical supplies left in charge of a medical officer, or found by him at any station, although not responsible by the forms of a receipt, will be taken up on his returns and requisitions; and invoices and re-

ceipts will, in all cases, be made out in alphabetical order, in correspondence with the standard supply-table.

54. Medical supplies are not to be detained or diverted from their destination, except by commanding Generals and commanding officers of departments, in cases of absolute necessity, who will promptly report the circumstances to the Adjutant-General, that orders may be given for supplying the deficiency; and the Surgeon receiving them will immediately report the fact to the Surgeon-General, and transmit his receipts for the articles; and also, when practicable, notify the Surgeon for whom they were intended.

55. Requisitions for extra supplies of medicines and hospital stores, required in consequence of the marching of a detachment, an increase of the command, &c., will be made by the Surgeon, agreeably to the supply-table, and approved by the commanding officer, (Form 11,) *duplicates of which will be immediately transmitted to the Surgeon-General.*

56. Requisitions for cooking utensils and for the hospital furniture ordinarily supplied, will also be made by the senior Surgeon and approved by the commanding officer; and if they cannot conveniently be obtained from the Commissary of Purchases or a Military Storekeeper, or if extra supplies of medicines and hospital stores cannot be obtained from the Medical Purveyor, they may be purchased by the Surgeon or an officer of the Quartermaster's department. The accounts, (Form 12,) will be accompanied with a receipt of the Surgeon for the articles; and if the purchase has been made by

him, they will be transmitted to the Surgeon-General's office for payment; separate and distinct requisitions, as well as accounts, will in all cases be made for medicines and other supplies furnished by the Medical Purveyors, and for cooking utensils and hospital furniture.

57. Requisitions on officers of the Quartermaster's department for hospitals, and the necessary fixtures and hospital tents, for fuel, straw, and wagons for transportation of the sick, medicines, hospital stores, &c., will be made by the senior Surgeon, and approved by the commanding officer. Requisitions for hospitals will state the number and dimensions of the rooms required, the use to which they are severally to be applied, and the strength of the command for which they are estimated; duplicates of which will be transmitted to the Surgeon-General.

58. When a Surgeon is ordered away from the medical supplies under his charge, or receives leave of absence, he will immediately make to the Surgeon-General a return of all articles received, expended and issued, since his last regular return, accompanied with a receipt in detail for the remainder, if he be relieved by a Surgeon; but if he deliver them to a Quartermaster, a Military Storekeeper, or other person than a Surgeon, he will, with the returns and one of the receipts given him, transmit an invoice of the articles delivered, certified on honor; a copy of which invoice, signed by him, shall be left with the supplies; and when any Surgeon or Medical Purveyor receives the articles thus left,

he shall, in his next return, state by whom they were left, as well as from whom they were received.

59. Every Surgeon and Surgeon's Mate, on leaving his *post*, *station* or *regiment*, either under orders or on leave of absence, will report to the Surgeon-General the time of his departure, and report himself once a week, until he reaches his place of destination or returns to duty, when he will also report his arrival.

60. All Surgeons attending recruiting rendezvous, will make weekly reports to the Surgeon-General of the number of men examined by them, (Form 13.)

61. The receipt of all official communications will be promptly acknowledged by the medical officers to whom they are addressed, except those which merely acknowledge the receipt of communications from them; and all communications for the Medical department will be addressed directly to the Surgeon-General.

MEDICAL BOARD OF EXAMINATION.

62. No person shall be appointed or promoted in the Medical Staff of the State until he shall have passed an examination before a proper board, and received therefrom a favorable report.

63. A board, consisting of not more than three Surgeons, will be detailed from time to time, by order of the Surgeon General, who will examine all persons who have obtained a permit from the Commander-in-Chief, to present themselves. In the execution of this duty, the Board will rigidly scrutinize the pretensions of each candidate; taking into consideration his physical qualifications and

moral habits, as well as his professional acquirements; and will report favorably upon no case admitting a reasonable doubt. The health and lives of the officers and soldiers are too important objects to be committed to ignorant and incompetent hands.

64. The board will report the positive merit of the candidates in the several branches on which they may be examined, and their relative merit, from the whole examination; agreeably to which they will receive appointment, and take rank in the department.

65. When a candidate for appointment shall fail to receive a favorable report, he may, if desired, be admitted to a second examination, after the expiration of two years; and, on a second failure, will be dropped from the list of applicants.

66. No allowance will be made for the expenses of persons undergoing these examinations, as they are considered indispensable pre-requisites to appointment; but those who are approved, and receive appointments, will be entitled to transportation on obeying the first order.

The pay and emoluments of Surgeons and Surgeon's Mates of the United States Army are shown by the following table:

	Pay per month.	No. of rations per day.	Amount of rations per month.	No. of horses for which forage is allowed.	Amount for forage per month.	SERVANTS. No. for which pay is allowed.	Amount allowed for pay per month.	Amount allowed for cloth'g per month.	Amount allowed for rations per month.	Total am't allowed per month.	Aggregate amount receivable.
Surgeon's Mate, under five years' service.....	$53 33	4	$36	1	$8	1	$12	$2 50	$9	$23 50	$120 83
Surgeon's Mate, over five years' service.....	70 00	4	36	1	8	1	12	2 50	9	23 50	137 50
Surgeon's Mate, over ten years' service.....	70 00	8	72	1	8	1	12	2 50	9	23 50	173 50
Surgeon, under ten years' service.....	80 00	4	36	3	24	2	24	5 00	18	47 00	187 00
Surgeon, over ten years' service.....	80 00	8	72	3	24	2	24	5 00	18	47 00	223 00

The allowance for forage and servants is only paid to the Surgeons and Surgeon's Mate when they actually employ and keep in service the number of servants and horses charged for.

In addition to the above, Surgeons and Surgeon's Mate are allowed an additional ration per day, after the termination of every five years' service.

67. No person shall be appointed a Surgeon until he shall have served three years as a Surgeon's Mate; nor shall any Surgeon's Mate be permitted to decline promotion, except for reasons growing out of the interests of the service. At the expiration of three years' service, or as soon after as practicable, each one shall be examined by a Medical Board for promotion; and in the event of his refusal to appear before the board, or his failure to receive a favorable report, his connection with the Medical Staff shall cease from that time.

GENERAL.

68. The regularity and proper management of military hospitals so materially tend to the good of the service, and so much promote the comfort of the soldiers, that the necessity of giving the most constant attention to these important objects cannot be too strongly impressed on the minds of all officers in command.

69. Hospitals are under the immediate direction of their respective Surgeons. The responsibility for their order, regularity and cleanliness, for the diet and care of the patients, and for the general conduct and economy of the whole establishment, rests entirely with them. Commanding officers are enjoined to furnish such military assistance as may be necessary for the attainment of these objects; and all non-commissioned officers and others placed in the hospital in aid of the Surgeon, are commanded to yield the most implicit obedience to the instructions they may receive from him, and to enforce, in

every instance, the most minute observance of the hospital regulations.

70. The senior medical officer of each regiment, post, garrison or camp, will, with the approbation of the commanding officer, select a suitable site for the erection of an hospital, or of hospital tents. The allowance of fuel, quarters and straw for the sick, and wagons for their transportation, and that of the medical stores, will also be regulated by the Surgeon and commanding officer, or Brigade Surgeon; the requisitions to be signed by the former and countersigned by the latter.

71. Every Surgeon and Surgeon's Mate having charge of an hospital will, with the approbation of his immediate commanding officer, appoint his own steward, ward-master, cooks, nurses and matrons. They will be permanently attached to the hospital, and unless required by the commanding officer to attend weekly inspections, or the regular musters for payment, they will be exclusively under the orders of the Surgeon and Surgeon's Mate, and will not be removed except for misdemeanor, and at the request of the Surgeon, unless in cases of urgent necessity; and then only by the order of the commanding officer of the troops, district, department, regiment, post or garrison, to which they belong, who will report to the Adjutant-General the circumstances which rendered such removal necessary. When a suitable Hospital Steward cannot be obtained from the command, the Surgeon or Surgeon's Mate is authorized to enlist a man for the purpose, who will be permanently attached to the hospital,

and will be mustered and paid with the other hospital attendants.

72. The following will be the allowance of attendants in an hospital in ordinary cases: To a general hospital, one non-commissioned officer as Steward, and one as Wardmaster, one nurse to every ten, one matron to every twenty, and one cook to every thirty patients. To an hospital where the command exceeds five companies, one non-commissioned officer as Steward and Wardmaster, one cook, two matrons and four nurses. To a post or garrison with one company, one private, as Steward and Wardmaster, one nurse and one matron; for every two additional companies, one nurse. The cooks and nurses to be taken from the privates of the army. The hospital Stewards at posts, or with a body of troops of more than four companies, will be allowed the pay, clothing and rations of a Sergeant of Ordnance; and, at all other posts, or with smaller bodies of troops, the pay, clothing and rations of the first Sergeant of a company of Infantry. The matrons will receive six dollars per month and one ration per day.

73. Issues to the hospital will be made on returns signed by the Medical officer. If the complete ration be not drawn, the cost of such component parts as are issued will be charged to the hospital at contract or cost prices, and the hospital will be credited by the whole number of rations due through the month at contract or cost prices. The balance of money found due the hospital, or such amount of it as may be required, will be expended by the Assistant Commissary of Subsistence

in the purchase of poultry, fresh meat, vegetables, milk and groceries, upon the requisitions of the Surgeon. This fund may also be appropriated to the purchase of garden-seeds, furniture, &c ; milch-cows, and forage for the same, and other necessaries when required for the use of the sick.

74. When a soldier is sent into an hospital, his arms and accoutrements will, if possible, be left with his company ; and in no instance will he take his ammunition with him. When sent to a general hospital, the Surgeon sending him will furnish a report, with a general account of his complaint, and the treatment adopted, (Form 14,) and also a certified copy of his descriptive list, which will, on the return of the soldier to duty, be transmitted to the officer under whose command he is placed, with a statement of any payments made, or clothing issued to him while in hospital. Should he leave the hospital on furlough, he will be furnished with a certified copy of his descriptive-list ; should he desert, the Surgeon will advertise him in the usual manner ; and in case of his death, his descriptive-list will be preserved in the hospital, for the benefit of his friends and heirs ; and on it will be stated the amount of clothing, money, &c., left by him ; and the Surgeon will, in all these cases, forthwith report to the commanding officer of his company or regiment, if practicable, and if not, will report to the Adjutant-General the facts and attending circumstances ; the time to which those who die were last paid, and the money and effects in their possession at the time of their decease.

75. Patients will not be removed from an hospital until reported by the Surgeon for duty, except in cases of emergency; and then only by order of the commanding officer of the post, regiment or army; and they should for a certain time be employed on duties where they are not liable to be too much exposed to the weather or to fatigue.

76. When a soldier is rendered unfit for service in consequence of wounds, disease or infirmity, the Senior Surgeon of the hospital, regiment or post, will furnish his Captain with a certificate of disability, (Form 15;) and when he is disabled in consequence of wounds, or other injuries received, or disease contracted, whilst actually in service of the United States, and in the line of his duty, he will also furnish duplicate certificates for pension. (Form 16.) But no certificate for discharge, or for pension, will be given except by officers of the "Hospital Department;" who will be particularly careful in the examination of all cases which have not been for some time under their own charge, and ascertained to be incurable; and especially of all alleged cases of epilepsy, convulsions, chronic rheumatism, derangement of the urinary organs, opthalmia, ulcers, or other obscure or doubtful complaints or injuries, which are liable to be feigned, or produced for the purpose of procuring a discharge; and no certificate will be given to men recently enlisted, on account of complaints or injuries of this character, until they shall have been for a sufficient time under the immediate observation of the medical officer to enable him to detect any attempt at deception.

77. Surgeons and Surgeon's Mates will attend all officers, non-commissioned offices, musicians and privates, and enlisted artificers and laborers in the service of the United States, who may be on duty at the post or place at which they are stationed or employed, and the private servants to which each officer is entitled by law. They will issue medicines and hospital-stores to them, and medicines only to their families.

78. They will be particularly attentive in the examination of recruits, and will cause each recruit to be stripped of all his clothes, and to move about and exercise his limbs in their presence, in order to ascertain whether he has the free use of them; that his chest is ample; that his hearing, vision and speech are perfect; that he has no tumors, ulcerated or extensively cicatrized legs; rupture, chronic cutaneous affection, or other disorder or infirmity, mental or physical, which may render him unfit for the active duties of a soldier, or be the means of introducing disease into the army; and they will ascertain, as far as practicable, whether the recruit is an habitual drunkard, or subject to convulsions of any kind, or has received any contusions or wounds of the head, which may produce occasional insanity. With any of these defects, the man will be rejected as unfit for service. All other points connected with the enlistment of recruits will be regulated by the medical officer, in accordance with paragraph 1299, of the regulations of the United States Army.

79. When a recruit joins a regiment, post, garrison, station or depot, the Surgeon will forthwith ascertain

whether he has had the variolous or vaccine infection, and if he has not, will see that he be vaccinated as soon as practicable; and for this purpose he will constantly keep good matter on hand, making application to the Surgeon-General for a fresh supply, as often as may be necessary.

80. In the selection of quarters, Surgeons will have choice with Majors; Senior Surgeon's Mates will have choice with Captains; and Junior Mates with First Lieutenants; the commanding officer of the post, or detachment, always having precedence of those under his command.

81. The assignment of Surgeons and Surgeon's Mates to regiments and posts will be made by the Major-General commanding, through the Surgeon-General. When the circumstances of the service will permit, those who shall have served the longest in their respective grades, will have choice of regiments and stations agreeably to rank, on written application through the Surgeon-General, stating the reasons therefor, and the posts they may select, in the order of preference; but no one will be transferred from the regiment or post to which he may have been assigned, for the purpose of making room for another. When attached to an army in the field, they will be assigned to duty by the Commanding-General, (unless otherwise ordered by the Commander-in-Chief,) upon the recommendation of the Surgeon-General.

82. No Surgeon or Surgeon's Mate will be absent from his regiment, post or station, for a period exceeding seven days, without having previously obtained the sanction of

the Commander-in-Chief or the Major-General, through the Surgeon-General, to whom the reasons for the application will be reported; nor until he shall have been relieved by a medical officer.

83. Surgeons and Surgeon's Mates of militia and volunteer corps, when in the service of the United States, shall be held responsible for all medical supplies received by them; nor shall their accounts be settled until satisfactory evidence be given to the Paymaster, or other disbursing officer, that their supplies have been properly appropriated.

FORM 1.—*Register.*

NAMES.	
Rank.	
Regiment or Corps.	
Company.	
Complaint.	
Admitted.	
Returned to duty.	
Deserted.	
Discharged from service.	
Sent to general hospital.	
On furlough.	
Died.	
REMARKS.	

FORM 2.—*Prescription-Book, Diet-Book, and Diet-Table.*

NAMES.	Sunday.	Monday.	Tuesday.	Wednesd'y	Thursday.	Friday.	Saturday.

The spaces in the Prescription-Book are to be filled up with the prescriptions at length, the times of administering the medicines, and the quantities to be given at each time. The diet of the patients will be divided into full, half, and low, to be designated in the Diet-Book by the letters F. H. and L.; and in order that the Steward may have precise instructions for delivering the Hospital-Stores, &c., the Surgeon will, from time to time, insert in the Diet-Book written directions of the quantity of each article in his store-room, which he may think necessary to each degree of diet. To each ten patients, for example, on low diet, a certain quantity of tea, sugar, &c. To each ten on half diet, a certain quantity of rice, milk, &c. These proportions would soon become familiar to the Steward, who has only to refer to the letters in the Diet-Book, to ascertain the whole quantity of any article to be delivered for the day, as well as the quantity for each ward. When any liquor is directed, or any other article not contained in these general instructions of the Surgeon, the precise quantity directed for each patient, will be noted in the Diet-Book. The Diet-Tables are to be filled up daily from the Diet-Book, and hung up in each ward of a general hospital.

FORM 3.—*Muster-roll of the Steward, Wardmaster, Cooks, Nurses and Matrons, attached to a Hospital.*

NAMES.	Rank.	Enlistment.		When attached to, or engaged in the hospital or infirmary.	When last paid.	By whom last paid.	REMARKS.

Average.			

In regard to this report, the utmost punctuality in every respect will be exacted. It will be accompanied with general observations upon the Medical Topography of the station in reference to the climate, the prevalent diseases, their peculiar character and supposed causes, and the treatment adopted. All cases of an unusual nature will be reported in detail, as recorded in the case-book. The requirements in regard to the "discharges and deaths" will also be strictly obeyed. The diseases of women and children, if given, must be stated separately. During military operations in the field, it will be the duty of the Medical Director to furnish a quarterly abstract from his monthly reports.

These reports are to be made out in the handwriting of the Surgeon, and they must be prepared and forwarded to this office within five days after they become due.

All cases of disease—those in quarters as well as in hospital—will be reported. Designate also the number accommodated in hospital. No duplicate of this report is required.

The Standard Supply Tables contain all the articles to be purchased by the Medical Purveyor for a Camp, except on the orders of the Surgeon General; but any less quantity may be required, or any article omitted at the direction of the medical officer. The field supply table is adapted to the numbers stated when about to take the field.

The *transfer* of the surgical instruments issued to each medical officer for his personal use, is positively forbidden. Those instruments will be accounted for to the Surgeon General, on the last day of each quarter from January 1st, in a special return, in which the true condition of each must be stated; and if any be lost or damaged, a report of the facts and circumstances attending such loss or damage, must be given.

STATION:

DATE:

.....

Surgeon, in charge of Hospital.

I certify, on honor, that I have carefully examined this Muster Roll; that I have mustered and minutely inspected the hospital attendants; and that the police and general condition of the Hospital Department is found to be as follows.

.....

Inspector and Mustering Officer.

MUSTER ROLL—*Continued.*

NOTES.

1.—Under the head of REMARKS, the *date* of any soldier's *joining*, whether *originally*, or from *any absence;* all changes of rank, by *promotion, appointment*, or *reduction*, with *date* of same, and *No., date*, etc., of order; all *authorized stoppages, fines, sentences*, with *No., Date*, etc., of order, etc.; in case of ABSENCE, the *nature* and *commencement* of, *No., date*, etc., of order, and *period* assigned for same (to be *repeated on every roll while it lasts*;) if *wounded* in battle, or *injured on duty*—if *sick*, or *confined*, a remark to that effect, etc., must be *carefully stated* opposite to the name of the person concerned, *with everything else necessary, either to account fully for every individual, to guide the paymaster, or ensure justice to the soldier, and to the State of Pennsylvania.*

2.—In noting STOPPAGES to be made for *loss* or *damage* to public property, the *gross amount* due for *Ordnance, Horse Equipments, Clothing, etc.*, will be *separately* stated in the order enumerated in par. 1187, G. R., U. S. Army.

3.—The roll of those *belonging to the hospital*, will be immediately followed by that of those who, since last muster, *have ceased to belong to it.* These will be classed in the following order, viz: *Discharged, Transferred, Died, Deserted;* and the *utmost particularity* will be observed in the *remarks* concerning them. *Date* and *place* will, *in every case*, be given; and *No., date*, etc., of *orders*, or *description of authority*, be always carefully specified. Soldiers discharged or *re-enlisted*, or who have deserted *and been retaken*, since last muster, have their place in *both* of the above rolls.

4.—The remark "*discharged and final statements given*" will be made opposite to the name of every discharged soldier, to whom such papers *have actually been given.* But the blank spaces under the head of LAST PAID, are to be filled as usual.

5.—Within *three* days after each regular muster, the mustering officer or commandant of the post, will transmit to the Adjutant

General a copy of the *muster roll* of each company. Blanks will be supplied from the Adjutant General's office, and will be *acknowledged* on the first muster roll forwarded after their receipt.

RECORD

Of Events which may be necessary or useful for future reference of the Adjutant General's office, or for present information.

PAY ROLL OF THE HOSPITAL.

Pay Roll of the Hospital, from the day of , 18 , when last paid, to the day of , 18 .

Period paid for.		Pay per month.	Amount of pay.		Retained pay.		Total am't due.		Am't of stoppages.		Balance paid.		Received payment.	Witness.
Mos.	Days.	Dollars.	Dolls.	Cts.	Dolls.	Cts.	Dolls.	Cts.	Dolls.	Cts.	Dolls.	Cts.		

NOTE.—Three muster and pay rolls are made at each muster—one to be retained with the hospital records, and two for the Paymaster. One *muster* roll is at the same time forwarded to the Adjutant General. The muster and pay roll blank is used for this purpose, the "pay roll" portion being cut off.

ADDENDA.

The comfort and recovery of the sick being often greatly dependent on proper diet, the attention of the Hospital Surgeon is especially directed to paragraph 1073 of the "Regulations of the Subsistence Department of the United States Army"—the supervision of the collection and disbursement of the "Hospital Fund," by the Commissary, being his *special duty*.

All other duties not specifically defined in the preceding pages, will be regulated on the principles established by the "Regulations of the Medical Department of the United States Army," edition of 1861.
